EDUCATION

National University of Singapore

Singapore

Bachelor of Computing (Honours) in Computer Science

Aug. 2023 – Jun 2027

- Minor in Data Analytics
- Relevant courses completed: Data Structures and Algorithms, Programming Methodology 1 and 2, Discrete Structures, Linear Algebra for Computing, Calculus for Computing, Computer Organisation, Introduction to Computer Networks, Introduction to Computer Security
- Relevant courses (currently enrolled): Software Engineering, Introduction to Operating Systems, Introduction to AI and Machine Learning

PROJECTS

OptiPlan (NUS Orbital) | [Click this link to view project](#)

- **Relevant tech stack:** React, Javascript, Node.js, Express.js, PostgreSQL, Vercel
- Developed a full-stack productivity web app using React Native for the front-end and Node.js for the back-end
- Adapted a modular monolithic architecture by dividing services into self-contained modules within a single deployable unit
- Implemented JWTAuth for user authentication and data synchronization
- Implemented an event calendar for task logging and viewing in 3 view layouts - Yearly, Monthly and Weekly view
- Implemented a dynamic kanban board with reactive animations to keep track of other events
- Implemented an analytics module to view graphical representations or detailed reports of productivity trends in 3 different view types - Total Event Count, Time Spent on Events, Year Chart

MWH SmartMart (Hack4Good) | [Click this link to view project](#)

- **Relevant tech stack:** React, Javascript, Typescript, Node.js, Next.js, MongoDB, Firebase
- Developed a full-stack voucher-based online mart application
- Utilised firebase auth to restrict user functionalities based on roles
- Offer intuitive tools for reporting and analysis to focus on impactful data.
- Focused on creating backend routes with authentication middleware for action and functionality restrictions

EXPERIENCE

Information Technology Intern

Singapore

My Healthcare Collective

Feb 2023 – July 2023

- Designed user journeys for the Clinic Management System and Patient App
- Thoroughly tested the Clinic Management System and Patient App and wrote reports on the areas which need workflow improvements
- Managed and communicated with the IT team regarding any issues or requests for the Clinic Management System and Patient App
- Went on meetings with the relevant users (doctors, nurses, patients, etc.) regularly to check up on possible improvements for the system

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL (Postgres), HTML/CSS

Frameworks: React/React Native, Express.js, Node.js, NumPy

Developer Tools: Git, GitHub Actions, Postman

Platforms: Vercel, Firebase, MongoDB

ADDITIONAL INFORMATION

Leadership Roles: Badminton Logistics Head (2024)

Languages: Indonesian (Native), English (Native), Malay (C1)

Volunteer Experience: Ember/Ace project 2021, Mission Remission fundraising project 2022

Current Availability: Summer 2025 (May 2025 - Aug 2025)
